

LOFT LEVEL PLATFORM  
Rafter and Joist positioning  
Made from 2" x 6" joists

There are 2 options of joist materials to choose from. You may use either 2x4s or 2x6s. Use of 2x4s require closer spacing. See notes at right.

NOTE 1:  
This image depicts the use of 2" x 4" joists spaced 8" apart from joist center to center.  
NOTE 2 :  
If 2" x 6" joists are used then the spacing may be increased to 16" from joist center to joist center

8 feet

LOFT ENTRANCE AREA  
To gain access to Loft from the First Floor area you will need either a ladder or staircase. If a staircase is used, there needs to be alterations to this area to accommodate it.

16 Feet
